

70994 SAFE-T SOLUTION complying with EN 1004

Frame section width	0.72 m
Platform length	1.50 m
Reach height	2.89 – 7.15 m, kit up to 7.65 m with SAFE-T KIT
Tower height	1.83 – 6.35 m, kit up to 6.65 m with SAFE-T KIT
Standing height	0.89 – 5.15 m, kit up to 5.65 m with SAFE-T KIT

- › Lightweight, versatile working tower, compact to store and transport.
- › Thanks to the exclusive use of 6-rung frame sections, no component is longer than 2.00 m.
- › Supplied in complete modules, packed in cardboard.
- › All braces and diagonal braces are fitted with the click system and so no tools are required for assembly and dismantling.
- › The basic module is a folding tower, particularly suited for working indoors (passes through any door).

Additional parts required:

- › Ballast 10 kg, order no. 004124
- › Wall connector, order no. 707241

SAFE-T KIT:

More safety in high spaces with the SAFE-T KIT. This accessory module raises any module by 0.50 m and fits it with handrails.

Permissible load:

200 kg/m² (2.0 kN/m²) according to tower group 3.

Note:

Every tower is accompanied by instruction manual for assembly and use. The required number of additional parts for fastening to the wall or ballasting may be found in the ballasting tables in the catalogue.

Ballasting 70994		
Order no.	kg	kg

BASEL III: NEGLIGIBLE IMPACTS ON CRAFTSMEN

From January 2014, the new EU Directives on banking regulations (Basel III) set stricter regulations concerning the issue of bank loans. For corporate loans banks must hold a third more equity capital of higher quality.

This leads to an increase in the cost of corporate loans since banks in future will demand that companies provide greater security – a difficult situation for many companies. A ray of hope: loans to medium-sized companies, to which most craft firms belong, are exempt from this new regulation due to their lower weighting.

The size of loans to medium-sized firms has even been extended: from one million Euro to 1.5 million Euro per institution, initially limited to three years. What remains is the rating obligation for companies, i.e. the classification of creditworthiness in degrees of risk. A good rating makes it easier to obtain external financing and allows companies to receive finance at a lower rate of interest. In order to be in a good position when it comes to it, you can be active:

- › Check regularly where your company stands and what you must change to continuously increase your earning power.
- › Set in writing your corporate concept and potential successes.
- › Conduct an open policy of communication with your bank, even in difficult times. In this way you build trust.
- › Submit the latest documents containing key figures, evaluations and target figures to your banking institute at the required intervals. This permits your bank to make a realistic estimation.
- › Decide on deputisation and company successor issues– this security also promotes trust.
